Employees in entry-level positions, with poor work-life balance, and frequent overtime are at the highest risk of leaving the company.

- **By Job Level:** Entry-level staff show a **63%** attrition rate, significantly **higher** than mid-level (**46%**) and senior staff (**20%**).
- **By Work-Life Balance:** Those rating their balance as **poor** have a **76%** attrition rate, while those with good balance drop to **57%**, and excellent balance to **51%**.
- **By Overtime:** Employees working overtime have an **80%** attrition risk, compared to **73%** for those without overtime — suggesting that even without overtime, other factors (e.g., role stress, workload) contribute to high turnover.

The group **Entry-level + Poor work-life balance + Overtime** has an attrition rate of **80.2%**, which is **more than 8 times higher** than the **Senior + Excellent balance + No overtime** group (**9.5%**). This sharp contrast highlights the compounded negative impact of low job level, poor work-life balance, and frequent overtime.

SOLUTIONS TO REDUCE UNEMPLOYMENT RATE

Onboarding & Support for Entry-Level Employees

- **Structured mentorship programs:** Pair each new hire with a senior mentor for the first 6–12 months.
- **Progressive skill ramp-up:** Start with achievable goals in the first 3 months, gradually increasing complexity.
- **Frequent feedback cycles:** Conduct bi-weekly check-ins to address frustrations before they escalate.

Improve Work-Life Balance

- **Flexible work arrangements:** Introduce hybrid or flexible hours for employees with consistent performance.
- **Encourage time-off utilization:** Actively monitor and remind employees to take annual leave.

Workload & Overtime Management

- **Set clear overtime thresholds:** Limit overtime to $\leq 10\%$ of monthly working hours for entry-level staff.
- **Mandatory “No-Overtime Days”:** One day per week where employees must leave on time to recharge

Organizational Culture & Engagement

- **Recognition & reward systems:** Celebrate achievements - big or small - to boost morale.
- **Open-door policy:** Encourage managers to be approachable for discussing workload and career growth.
